1. The Institute for Atomic Research is located on the right side of the Fardubice-Prelouc state highway on the edge of Kuchynka forest. The place is a former estate consisting of five two-story brick buildings in which the laboratories are located.

- 2.

3. The leading physicists and chemists of the Institute as well as the chiefs of various laboratories are mostly Soviet nationals.
4. The RAMO oil refinery is located on the east side of the single-track Bohice-Chrudim railway of the Czechoslovak State Railroads and on the north side of the double-track Pardubice - Prelouc railway of the Czechoslovak State Railroads. The refinery consists of several buildings located in the forest, a purifying tower and one oil reservoir. The plant is connected by a track with the main line of the Czechoslovak State Railroads in the Pardubice station. The area of the plant is 1,400 x 300 meters and is enclosed by a concrete wall two meters high, with a barbed wire extension. The refinery makes oil for automobiles and airplanes, pure gasoline, etc. The total number of employees is 1,200 men. The manager of the plant is Mr. (fnu) Tesar.
5. Raw material is supplied by Hodonin and Goele in Czechoslovakia and from Rumania. The plant is still under construction and is being extended. The refinery was hit hard by bombing in 1944 - 1945. The supply of raw material is 25-35 tank cars of crude oil per day. A tank car is 4.5 meters long and two meters in diameter. The crude oil is stored in underground reservoirs made of concrete. Water is pumped into the condensation towers from the Elbe river.
